Bright Coffee Shop

Driving Business Growth: Sales Forecast Analysis
(Jan - June 2023)

Presented by Phillipine Sithole

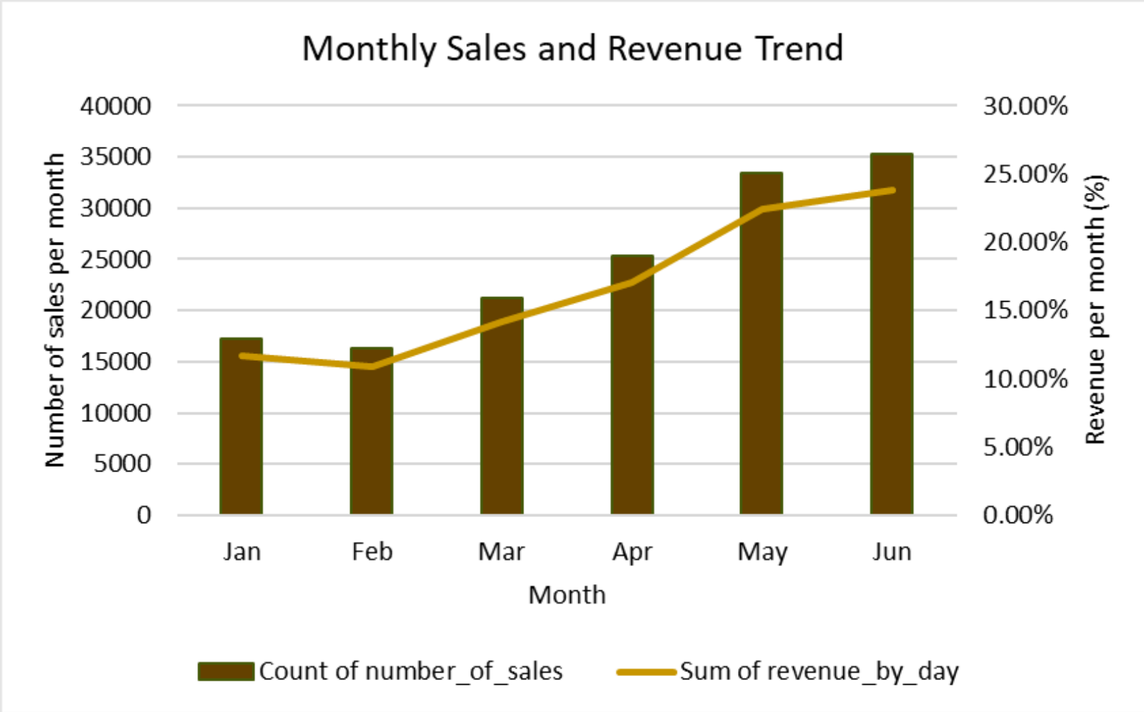
Presentation Outline

1. Project Overview
2. Overall Bright Coffee Shop Sales Trends
3. Cross Store Comparison Analysis
4. Recommendations

Project Overview

The objective of this project is to analyze sales performance across products, time periods, and store locations in order to identify key drivers of revenue, optimize the product mix, and recommend strategies to maximize growth, profitability, and customer engagement.

Monthly Sales Growth and Revenue Trends

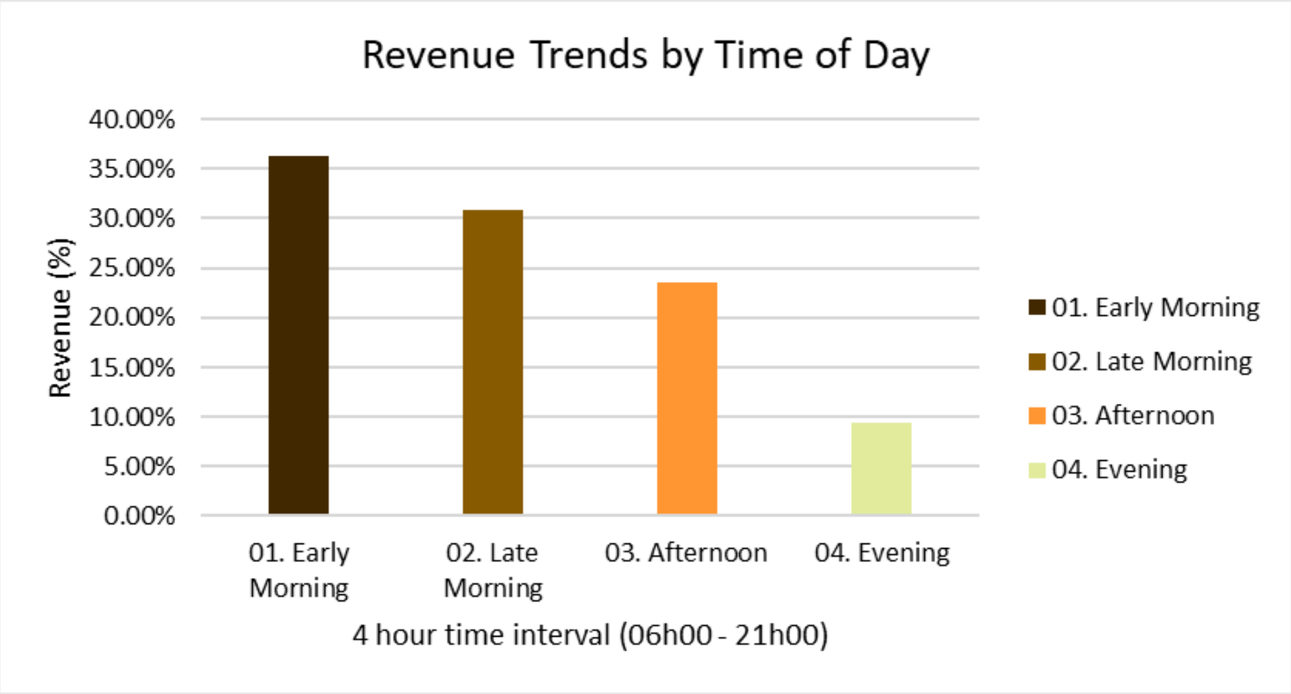


Description	Spending Levels	% of Revenue	% of Customer Count
Low spend	R00.00 - R50.00	99.44%	99.95%
Medium spend	R51.00 - R150	0.52%	0.04%
High spend	R151.00 - R250.00	0%	0%
Ballers	R251 or more	0.05%	0.01%

Key Insights

- Strong correlation between sales volume and revenue growth (positive growth trends).
- Total revenue contribution increases from **11.69%** (Jan) to **23.82%** (Jun), with peak performance in June **(23.82%)** followed by May **(22.43%)**.
- February records the lowest sales and revenue contributing **16308** in sales volume and **10.90%** in revenue.
- Most revenue is generated from customers who spend =< **R50** and this segment accounts for **99.95**% of customer volume.

Sales Trends Across Time Intervals (Jan–Jun)

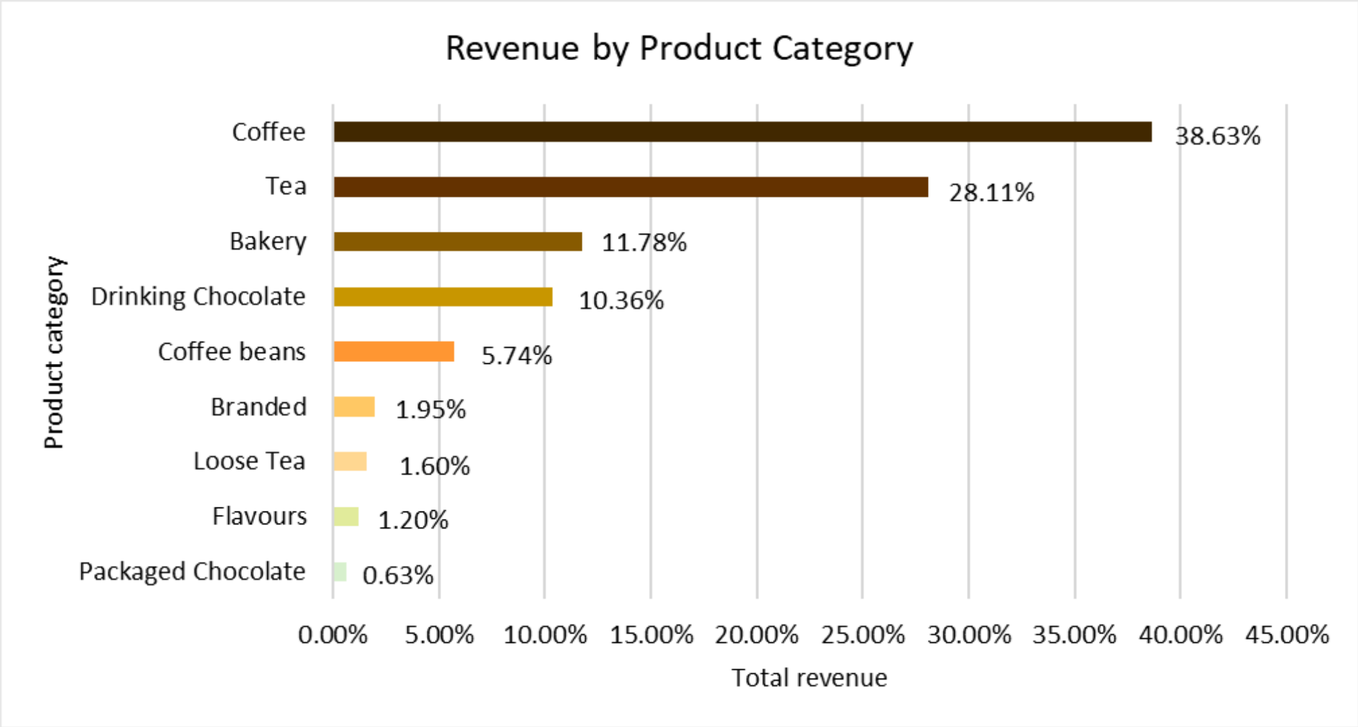


Description	Time Interval	% of Revenue	% of Customer Count
Early Morning	06:00:00 - 09:59:59	36.25%	35.77%
Late Morning	10:00:00 - 13:59:59	30.85%	30.66%
Afternoon	14:00:00 - 17:59:59	23.51%	24.03%
Evening	18:00:00 - 21:00:00	9.40%	9.53%

Key Insights

- Early Morning has the highest share of revenue at **36.25%**, followed by Late Morning at **30.85%**.
- The Evening period has the lowest revenue share of **9.40%:** indicating lower sales activity.
- Early Morning and Late Morning account for the majority of customers by **66.43:** highlighting that morning is the peak period.

Product Category Performance Overview



Top 3 Best Performing Products

1. Coffee
2. Tea
3. Bakery

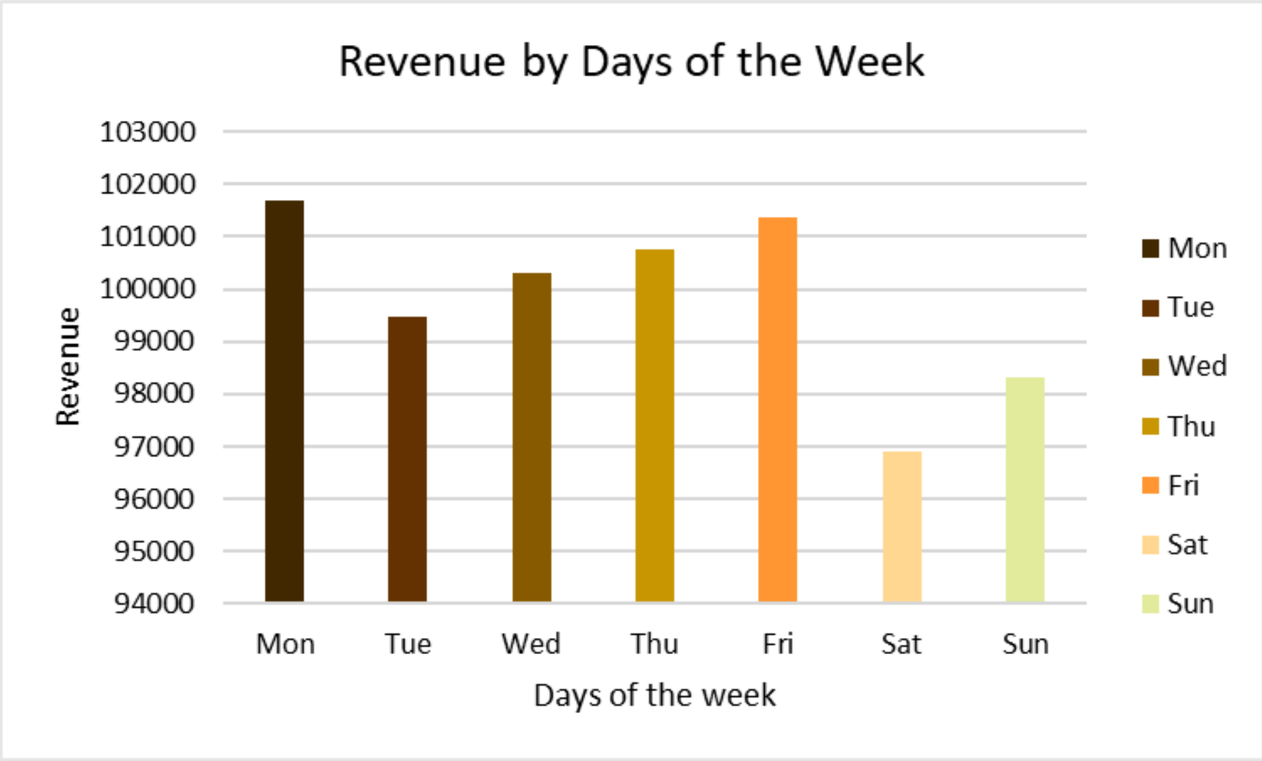
Bottom 3 Worst Performing Products

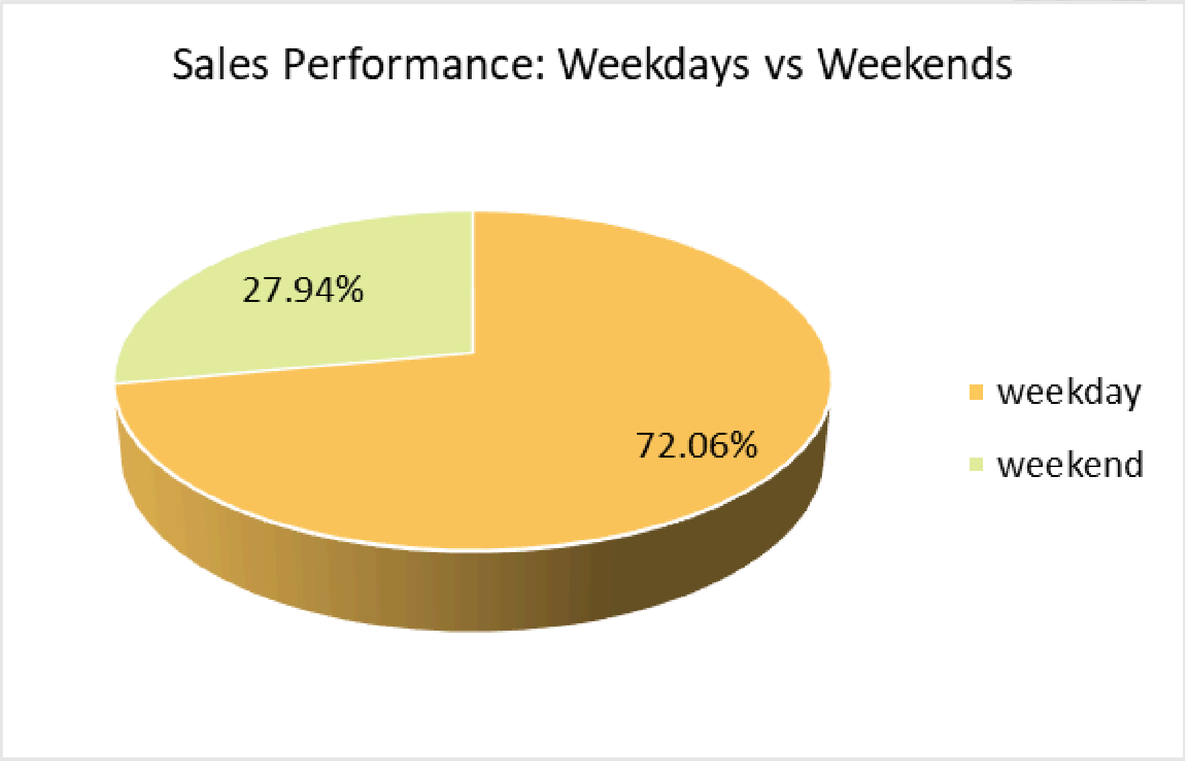
1. Packaged Chocolate
2. Flavours
3. Loose Tea

Key Insights

- Coffee generates the highest revenue at **38.63%**, making it the top-performing product category. Tea follows with **28.11%** of the total revenue.
- Loose Tea, Flavours and Packaged Chocolate represents low revenue products accounting for combined **3.43%** revenue.
- Coffee **(39.21%)** and Tea **(30.54%)** dominate product sales followed by Bakery (15.16%) and Drinking Chocolate (7.71%) indicating these are popular complementary items..
- Loose Tea, Flavours and Packaged Chocolate have minimal share of product sold contributing by **1.64%**.

Weekly Revenue Insights: Top Performing Days

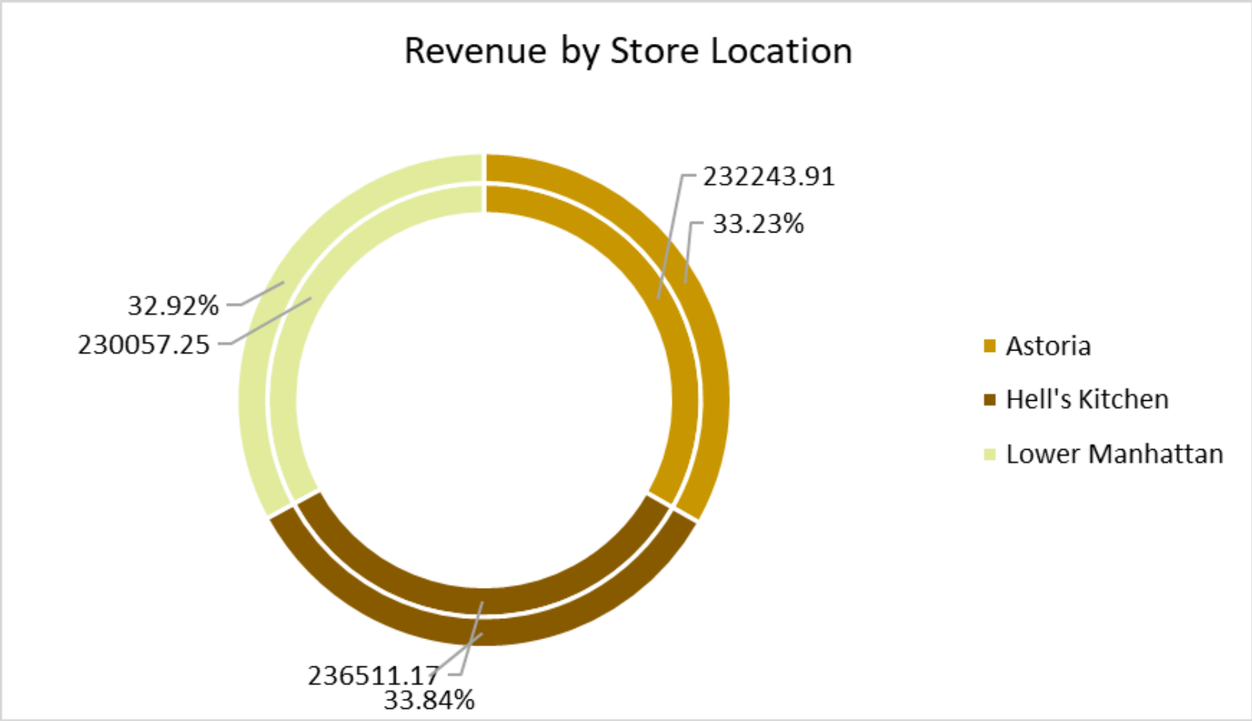


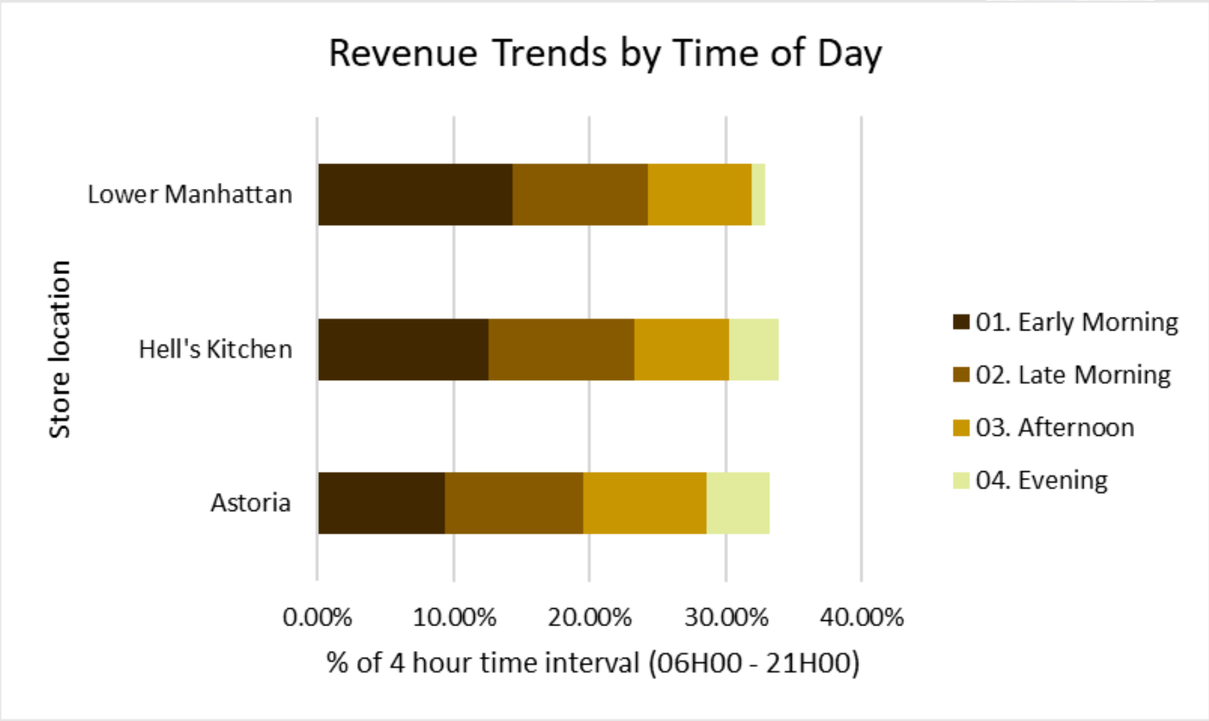


Key Insights

- Mondays generates the most revenue **(R101,677)** , closely followed by Fridays **R101,373**.
- Saturday generates the least revenue **"R96,894".**
- Weekdays generate the highest revenue acconting for **72.06%** of the total revenue and **72.09%** of products sold.

Revenue Performance Across Store Locations





Key Insights

- Hell's Kitchen slightly leads in revenue by **33.84%**. Astoria follows by **33.23%**.
- All stores peak during the morning drive with Lower Manhattan contributing **24.24%** of total revenue.
- Sales performance is low across all stores during the evening contributing **9.53%** of total revenue.

Product Performance Across Store Location

Key Insights

- Coffee is the top-selling product category across all locations, accounting for **38.63%**. Hell's Kitchen accounts for the highest revenue by **13.05%** followed Astoria with **12.84%**.
- Tea contributes the second highest revenue by **9.71%** in Astoria and Hell's Kitchen contributes **9.24%**.
- Branded, Loose Tea, Flavours and Packaged Chocolate contribute minimally (under **2%** individually), suggesting these are less popular items.

Revenue Trends by Day Classification Across Store Location

Key Insights

- Hell's Kitchen generates the highest revenue accounting for **24.39%** followed by Astoria **(23.98%)**.
- Lower Manhattan generates slightly lower revenue compared to the two store **(23.72%)**.
- Weekdays are the primary revenue driver, making up nearly three-quarters of total sales (72.09%). Astoria accounts for the highest number of sales **(24.52%)** followed by Hell's Kitchen **(24.51%)**.

Recommendations

Product Strategy

- Review or reposition low-selling categories (e.g., packaged chocolate, flavours). Consider bundling them with high-demand products (e.g., coffee + small chocolate). Promotions or discounts to encourage trial and remove/introduce new products if customer behaviour does not change.
- Coffee (38.63%) and Tea (28.11%) are the main revenue contributors. Introduce premium or seasonal variants, limited-time flavors, or customizable options to increase average spend per customer.
- Offer loyalty rewards for repeat visits outside peak hours (Afternoon and Evenings).
- Promote combo deals (coffee + bakery, tea + chocolate) during morning drive to maximise revenue.

Enhance Store & Location Strategy

- Promote bakery + coffee combos for busy mornings in Lower Manhattan.
- Identify High-Potential Areas: Analyze foot traffic patterns, commuter density, and competitor presence in potential neighborhoods.
- Use existing store performance (Astoria, Hell's Kitchen, Lower Manhattan) to model expected sales per location.

Marketing and Customer Engagement

- Leverage digital channels, social media, and email marketing for promotions, new product launches, new packaging and loyalty programs.
- Morning upsell campaigns: Promote combo deals during peak hours to maximize high traffic.
- Off-peak promotions: Introduce discounts or loyalty incentives in the afternoon/evening to drive traffic.
- Weekend experiences: Create events, special menus, or promotions to increase weekend footfall.

Thank You
